Contents of Volume 7

Number 1

Short Communication
D. A. Spandidos 1 The effect of exogenous human *ras* and *myc* oncogenes in morphological differentiation of the rat pheochromocytoma PC12 cells

M. Moggio, N. Bresolin, E. Scarpini, L. Adobbati, A. Prelle, A. Gallanti, L. Bet, F. Fortunato, G. Pellegrini and **G. Scarlato** 5 Cytochrome *c* oxidase during human fetal development

R. H. B. Fishman, A. Ornoy and **J. Yanai** 15 Correlated ultrastructural damage between cerebellum cells after early anticonvulsant treatment in mice

W. A. Radwan, N. A. Granger and **J. M. Lauder** 27 Development and distribution of serotonin in the central nervous system of *Manduca sexta* during embryogenesis—I. The brain and frontal ganglion

W. A. Radwan, J. M. Lauder and **N. A. Granger** 43 Development and distribution of serotonin in the central nervous system of *Manduca sexta* during embryogenesis—II. The ventral ganglia

N. A. Granger, U. Homberg, P. Henderson, A. Towle and **J. M. Lauder** 55 Serotonin-immunoreactive neurons in the brain of *Manduca sexta* during larval development and larval–pupal metamorphosis

N. Parés-Herbuté, L. Tapia-Arancibia and **H. Astier** 73 Ontogeny of the metencephalic, mesencephalic and diencephalic content of catecholamines as measured by high performance liquid chromatography with electrochemical detection

B. Zimmerberg and **L. V. Scalzi** 81 Commissural size in neonatal rats: effects of sex and prenatal alcohol exposure

R. E. Baker and **D. G. Janzen** 87 Non-selective afferent innervation develops in embryonic mouse spinal cord–dorsal root ganglia explants chronically exposed to GM1 ganglioside

R. E. Baker, B. Guérold and **H. Dreyfus** 93 Gangliosides of the mouse spinal cord: a comparison in *in vivo* and *in vitro* tissues

E. Buse, A. Kindler-Röhrborn and **M. F. Rajewsky** 103 *In vitro* experiments on neuronal and glial cell lineages among the ventricular cells of the mouse neural plate

I. Schousboe, O. M. Larsson and **A. Schousboe** 115 Development of homospecific activity of GABA-transaminase in the mouse cerebral cortex and cerebellum and in neurons cultured from these brain areas

Erratum 123

Forthcoming Papers i

Number 2

C. P. Reynolds and **J. Regino Perez-Polo** 125 Nerve growth factor induces neurite outgrowth in a clone derived from an NGF-insensitive human neuroblastoma cell line

G. M. Gilad, D. Dahl and V. H. Gilad	133	Effects of glycosaminoglycans and proteinase inhibitors on astroglia-induced detachment of cultured rat cerebellar neurons
B. Bjelke and Å. Seiger	145	Morphological distribution of MBP-like immunoreactivity in the brain during development
C. Brodie and S. R. Sampson	165	Characterization of resting membrane potential and its electrogenic pump component in cultured chick myotubes
J. Barg, R. Levy and R. Simantov	173	Expression of the three opioid receptor subtypes μ, δ and κ in guinea pig and rat brain cell cultures and *in vivo*
T. Yoshioka and O. Tanaka	181	Histochemical localization of Ca^{2+}, Mg^{2+}-ATPase of the rat cerebellar cortex during postnatal development
I. Torres-Aleman, F. Naftolin and R. J. Robbins	195	Growth promoting effects of IGF-I on fetal hypothalamic cell lines under serum-free culture conditions
U. R. Thakare, D. H. Shah and U. Vijayan	203	Malic enzyme activity in the developing rat brain in relation to thyroid status
A.-M. Dalseg, D. Linnemann and E. Bock	209	Soluble neural cell adhesion molecule in brain, cerebrospinal fluid and plasma in the developing rat
R. Westermann, J. Mollenhauer, M. Johannsen and K. Unsicker	219	Laminin and other basal lamina proteins with neurite promoting activity in medium conditioned by C6 glioma cells
Announcement	231	Prefrontal cortical systems. 16th International Summer School of Brain Research

Number 3

A. Vanella, R. Avola, D. F. Condorelli, A. Campisi, A. Costa, A. M. Giuffrida Stella and J. R. Perez-Polo	233	Antioxidant enzymatic activities and resistance to oxidative stress in primary and subcultured rat astroglial cells
M. Paternostro and E. Meisami	243	Selective effects of thyroid hormonal deprivation on growth and development of olfactory receptor sheet during the early postnatal period: a morphometric and cell count study in the rat
J. Guiramand, I. Sassetti and M. Recasens	257	Developmental changes in the chemosensitivity of rat brain synaptoneurosomes to excitatory amino acids, estimated by inositol phosphate formation
S. Biagioni, T. Odorisio, G. Poiana, G. Scarsella and G. Augusti-Tocco	267	Acetylcholinesterase in the development of chick dorsal root ganglia
L. Lauriola, F. Michetti, A. Coli, G. Bigotti and D. Cocchia	275	Satellite cells in developing spinal ganglia. An immunohistochemical study
J. Koenig, Dj. Hantaz-Ambroise, S. De La Porte, N. A. Do Thi, J. M. Bourre, F. La Chapelle and H. L. Koenig	281	*In vitro* evidence for a neurite growth-promoting activity in Trembler mouse serum
L. Lima, P. Matus and B. Drujan	295	Spatial distribution of glutamate, taurine and GABA in teleosts and mammals retina: *in vivo* and *in vitro* study
A. Rami, A. Rabie and J. Clos	301	The time course of hippocampal cholinergic innervation in the developing hypothyroid rat. A combined histochemical and biochemical study of acetylcholinesterase activity

R. F. Alderson, F. Sutton and E. T. Butler III — 309 — Modulation of neuronal choline acetyltransferase activity by factors derived from cultures of non-neuronal cells from the CNS

Forthcoming Papers — i

Number 4

G. Normand, J. Clos, F. Vitiello and G. Gombos — 323 — Developing rat cerebellum—I. Effects of abnormal thyroid states and undernutrition on sulfated glycosaminoglycans

G. Normand, F. Vitiello, J. Clos and G. Gombos — 329 — Developing rat cerebellum—II. Effects of abnormal thyroid states and undernutrition on hyaluronic acid

F. Vitiello, J. Clos, C. Di Benedetta and G. Gombos — 335 — Developing rat cerebellum—III. Effects of abnormal thyroid states and undernutrition on gangliosides

A. Bignami and D. Dahl — 343 — Vimentin–GFAP transition in primary dissociated cultures of rat embryo spinal cord

Y. Kagotani, T. Hashimoto, Y. Tsuruo, H. Kawano, S. Daikoku and K. Chihara — 359 — Development of the neuronal system containing neuropeptide Y in the rat hypothalamus

L. Lima, P. Matus and B. Drujan — 375 — The interaction of substrate and taurine modulates the outgrowth from regenerating goldfish retinal explants

W. L. Muhlach and E. D. Pollack — 383 — Stimulation of choline acetyltransferase in spinal cord explants by limb mesenchyme

J.-M. Verna, A. Fichard and R. Saxod — 389 — Influence of glycosaminoglycans on neurite morphology and outgrowth patterns *in vitro*

F. Besnard, F. Perraud, M. Sensenbrenner and G. Labourdette — 401 — Effects of acidic and basic fibroblast growth factors on proliferation and maturation of cultured rat oligodendrocytes

Forthcoming Papers — i

Number 5

DEVELOPMENT AND PLASTICITY OF SYMPATHOADRENAL CELLS

K. Unsicker — 411 — Preface

K. Unsicker, K. Seidl and H. D. Hofmann — 413 — The neuro-endocrine ambiguity of sympathoadrenal cells

R. E. Coupland and A. Tomlinson — 419 — The development and maturation of adrenal medullary chromaffin cells of the rat *in vivo*: a descriptive and quantitative study

A. S. Tischler, L. A. Ruzicka, S. R. Donahue and R. A. DeLellis — 439 — Chromaffin cell proliferation in the adult rat adrenal medulla

P. Bernd — 449 — Catecholaminergic cells and support cell precursors in neural crest cultures differentially express nerve growth factor receptors

K. Seidl and K. Unsicker — 465 — Survival and neuritic growth of sympathoadrenal (chromaffin) precursor cells *in vitro*

D. J. Anderson and **A. Michelsohn**	475	Role of glucocorticoids in the chromaffin–neuron developmental decision
D. C.-C. Wan, C.-l. Choi and **B. G. Livett**	489	Developmental expression of proenkephalin A mRNA and phenylethanolamine N-methyltransferase mRNA in foetal sheep adrenal medulla
E. F. La Gamma, J. D. De Cristofaro, B. L. Agarwal and **G. Weisinger**	499	Ontogeny of the opiate phenotype: an approach to defining transsynaptic mechanisms at the molecular level in the rat adrenal medulla
W. Jiang, R. Uht and **M. C. Bohn**	513	Regulation of phenylethanolamine N-methyltransferase (PNMT) mRNA in the rat adrenal medulla by corticosterone
J. L. Morris and **I. L. Gibbins**	521	Co-localization and plasticity of transmitters in peripheral autonomic and sensory neurons
J. E. Adler	533	Neuronal aggregation and neurotransmitter regulation: partial purification and characterization of a membrane-derived factor
C. E. Hill and **M. Vidovic**	539	The role of competition in the refinement of the projections of sympathetic neurons to the rat eye during development
S. Soinila, M. Ahonen, T. Lahtinen and **O. Häppölä**	553	Developmental changes in 5-hydroxytryptamine immunoreactivity of sympathetic cells

Number 6

L. Aloe and **R. De Simone**	565	NGF primed spleen cells injected in brain of developing rats differentiate into mast cells
B. M. De Jong and **J. M. Ruijter**	575	Cell number, tissue thickness and protein content as measures for development and variability in cultured neocortex explants
F. Lancaster, C. Delaney and **T. Samorajski**	581	Synaptic density of caudate-putamen and visual cortex following exposure to ethanol *in utero*
D. Hantaz-Ambroise and **A. Trautmann**	591	Effects of calcium ion on neurite outgrowth of rat spinal cord neurons *in vitro*: the role of non-neuronal cells in regulating neurite sprouting
J. Engele, C. Pilgrim and **I. Reisert**	603	Sexual differentiation of mesencephalic neurons *in vitro*: effects of sex and gonadal hormones
J. Luthman, I. Strömberg, E. Brodin and **G. Jonsson**	613	Capsaicin treatment to developing rats induces increase of noradrenaline levels in the iris without affecting the adrenergic terminal density
L. W. Haynes and **F. M. Semenenko**	623	The trophic responses of avian sensory ganglia *in vitro* to N-acetylated and des-acetyl forms of α-melanocyte stimulating hormone (α-MSH) are qualitatively distinct
M. Ando and **R. Hammerschlag**	633	Premetamorphic effects of thyroid hormones on tadpole sensory ganglia
G. M. Gilad, M. Dornay and **V. H. Gilad**	641	Polyamines induce precocious development in rats. Possible interaction with growth factors
L. Marlier, P. Poulat, N. König, M. J. Drian and **A. Privat**	655	Influence of GM1 gangliosides on the growth of cultured rat embryonic serotonergic neurons
Announcement	667	3rd Conference of the Institute of Developmental Neuroscience and Aging
Forthcoming Papers	i
